About Our Company

Bock : It is the parent company. Under which Bock Automotive, Bock Foods, Bock Space, Bock AI, Bock Chain, Bock Health, Bock Force & Bock Education are the subsidiary companies. Bock is formed for the welfare of the society, to provide the right thing to the people. Out of 8 subsidiary companies, Bock has only started working on 6 for now. Bock Automotive, Bock Foods, Bock Space, Bock AI, Bock Chain & Bock Health. The rest 2 will be operational when required.

Bock Automotive :

Bock Automotive focuses on Sustainable Energy Transport, we see that there are more problems like pollution/depletion of fossil fuels by the usage of IC Engine vehicles. To solve that issue, EVs were introduced. They did not solve the problems yet, the pollution caused in manufacturing a battery is equivalent to the pollution caused by an IC engine vehicle. Also, the Na/K ion reserves are very limited. The charging infrastructure is not yet built across the world & electricity demands due to EVs may drastically increase in future.

To solve all these we have built a concept vehicle called Self-Powered Vehicle (SPVs). The energy required is met by just running the vehicle itself, 100% of the energy is renewable sources (sounds crazy, but we have already figured it out. Remember ? How EVs sounded crazy 20 years ago, but today it's a grand success). We almost have a range of 3,000 km by running the car for 500 km.

Initially we will start building the sedan cars. Later, we will move on to developing a sports car variant. Then, 2/3 wheeler, Hyperloop development & then Air taxi. This is a 2 decade plan & is estimated to have a **\$3T market cap**.

Bock Foods :

Around 3 billion people cannot afford a healthy diet world wide. In India 27 million people cannot afford an energy sufficient diet. Around 70% of the Indian population cannot afford a healthy diet. Along with that we have a new problem, exploitation of end consumers (charging higher price than usual), delivery agents (paying them less incentives) & hotel management (sharing less incentives) by third party service apps (Zomato/Swiggy). Where they end up making profits without considering the extra problems that they have created in this food/grocery industry. We at BockFoods have a mission of providing affordable & nutritious food to all. You will be able to get food which is much more nutritious & tasty with half of the price that you are paying right now. We have built our own ecosystem by these :

About Our Company

Improvised Delivery

We have improvised the logistics, implementing an autonomous drone delivery system which ensures 15 min delivery.

Improvised Hotels

Hotels having automated kitchens facilitated by cooking robots automating the process & removing human intervention making it a safe & clean food.

Enhanced Nutrition

Genetically modified vegetables/fruits/pulses/anything that is used to prepare the food which ensures much more nutritional value than the current existing practice.

This is a 2 decade plan & is estimated to have a **\$3T market cap**.

Bock AI :

It is the backbone of Bock, many automation work of other subsidiary companies are done at Bock AI. Starting with the building of Autonomous Vehicle Technology for the automobiles which were developed at Bock Automotive, we then move on building Autonomous Drone Delivery for the Drone Delivery built at Bock Foods. We also then help in building Automated restaurants, Automated Kitchens for Bock Foods & Automated Hospitals for Bock Health. We also help in developing Generative AI suite applications for Bock Chain's Blockchain & also help Bock Space in extensive utilisation of AI in the Space sector too. This is also a 2 decade plan & is estimated to have a **\$6T market cap**.

Bock Chain :

At Bock Chain, we are building our own blockchain and will revolutionize the internet landscape by addressing its inherent challenges. Our focus lies in empowering users through decentralization, ensuring the authenticity of information via blockchain technology. By harnessing the power of blockchain, we create a secure and transparent digital environment, fostering trust and innovation. Additionally, we contribute to global economic empowerment by introducing cryptocurrencies that mitigate the risks of economic recession and social inequality. We have planned to build a cutting-edge technology, backed by artificial intelligence, forms a robust synergy, empowering mankind with a transformative digital experience. We envision a future where the internet is not only a space for communication but a cornerstone for equitable economic growth and societal advancement. This is also a 2 decade plan & is estimated to have a **\$10T market cap**.

Bock Health :

At Bock Health, we are revolutionizing the healthcare landscape by the introduction of Automated Hospital. Imagine a world where you walk into hospitals where no human intervention is there (including the Doctors). Everything will be replaced by AI & the whole hospital will be automated. Initially starting with the prescribing robots which do the job of a Doctor, then we move on automating the hospital by the introduction of pharmaceuticals in our hospitals, later on we then build surgical robots which help in performing critical surgeries. By these ways the whole healthcare will be automated & will be able to build a one stop solution for the people in the healthcare sector. This is also a 2 decade plan & is estimated to have a **\$4T market cap**.

About Our Company

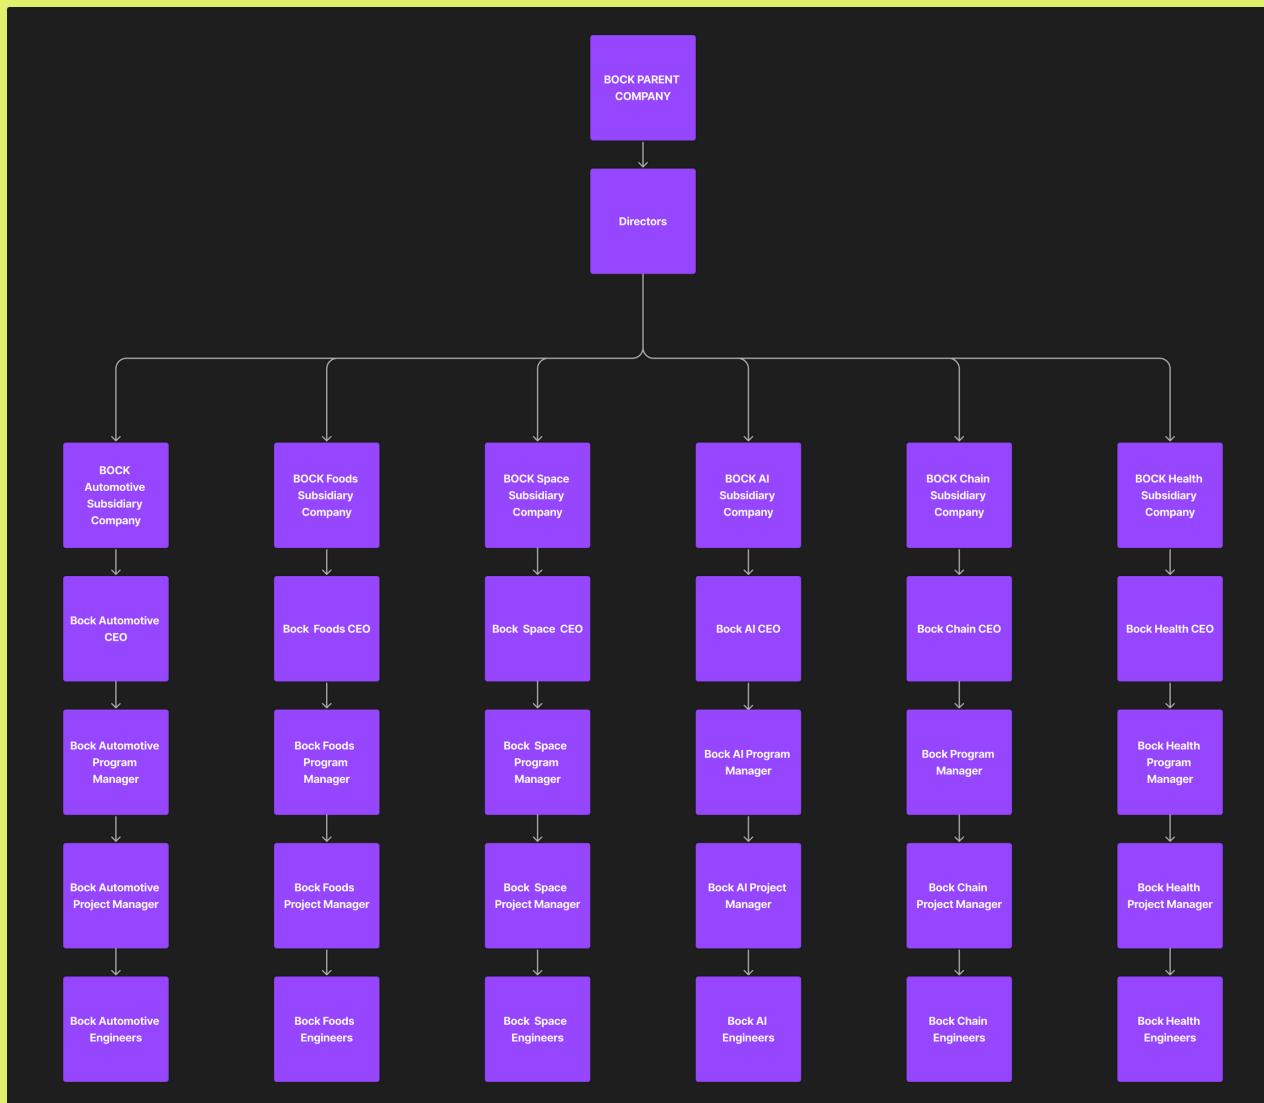

Bock Space :

Bock Space is a space research organisation managing 4 bodies under it. Bock Space will be a robust system for space technology which is highly ambitious in taking mankind towards advancements.

- Currently working on,
 - Bock Space Center for Rockets (BSCR): This is the company which builds rockets for commercialization of space travel purposes. This company mainly focuses on making the safest and affordable space travel. It aims at providing services to anyone who'd want colonies in any part of the solar system.
- Future plans,
 - Bock Space Center for Satellite (BSCS): This company mainly deals with manufacturing satellites and payloads. It builds satellites for commercial purposes and providing services.
 - Bock Space Center for Missiles (BSCM): This initially focuses on building intercontinental ballistic missiles from the knowledge and technology acquired through the above 2 companies.
- Bock space believes that science and technology always go hand in hand So Bock space has a research institute.
 - Bock Institute for Central Research and Technology (BICRT): This will be a world class institute for students, researchers, scientists and fellow citizens. It welcomes all the people of interest to do research and build technology for the betterment of mankind.

This is also a 2 decade plan & is estimated to have a **\$500B market cap**.

The Organisation Structure

The Organisation Structure

Directors :

- They form a board of members of Bock & are supreme authority at Bock.
- They are also the decision making authority at Bock.
- Any decision taken by them is final & should be respected (they always look into the company's vision, mission & principals).
- They have the power to terminate anyone at any point of time (with a valid reason specified & by the consultation of all the directors).
- Directors are the only authority through which anyone can enter/exit Bock, no other person/authority can interfere with it.
- The company will start with 3 Directors. Of which 1 should be a female.
- All the programs at Bock are headed by them.
- All the CEOs, Program Managers, Project Managers, Engineers & any other person in the company should work as the directors instruct.

CEO :

- Every Program has its own separate CEO at Bock.
- There is only one CEO in every program at Bock.
- No other authority/person from another program can interfere without the permission of the respective CEO.
- CEO work as directed by the board of directors, they can never exceed their powers more than the board of directors at Bock.
- They have powers in controlling the Program Manager, Project Managers & Engineers.

Program Managers :

- They work under the direction of their respective CEO.
- There is only one Program Manager in every program at Bock.
- They can never exceed their powers more than the CEO.
- They have the powers in controlling the Projects Managers & Engineers.

The Organisation Structure

Project Managers :

- They work under the direction of their respective Program Manager.
- There will be many projects under a program, so there will be many Project Managers working under their respective Program Manager.
- All the Project Managers report all their work to their Program Manager.
- They can never exceed their powers more than the Program Manager.
- They have the powers in controlling their respective allotted Engineers.

Engineers :

- They help in building technologies & innovating, they are the backbone of Bock.
- They work as instructed by their respective Project Manager.
- They can never exceed their powers more than the Project Manager.

Anyone other than the above mentioned :

- They work under the direction of the board of members (Directors).

****Founder :**

- Though the board of members (Directors) is the supreme controlling authority at Bock, yet the Founder is the ultimate controlling authority at Bock.
- Any internal disputes in board of members (Directors), the Founder can call for an emergency & is responsible in resolving the issue by whatever means (even if it is required in terminating board of members) & restoring the new set of board of members (Directors).
- No one/no authority can remove the Founder from the company at any point of time.

Co-Founders :

- The people who give exceptional support & show exceptional interest will be given the designation of Co-founders.
- This will be given by the founder by testing the candidate in the due course of the internship program accordingly.

The Timeline

- Bock believes that powers should be in the hands of responsible people. So, Bock gives opportunity to everyone without any discrimination.
- All the positions announced in The **Allotment section are tentative** (except the Founder). It's an open opportunity for all the recruited people to apply for special designations like Directors, CEOs, Program Managers & Project Managers positions.
- Initially, there will be a meeting where everyone should attend. This will be an orientation program & the first meet of the company **[Meeting 1]**.
- All the instructions will be given & everyone will be introduced by the team, Project Manager, Program Manager, CEO & Directors (all the tentative).
- All people have the right to attain any position in the company just by proving & proving their capabilities for the respective position that they are applying for.
- In the first round, directors will be selected **[Meeting 2]**.
- The next round of meetings, anyone in the company who wants to get into the CEO, Program Manager, Project Manager should apply for the specific position that they want to apply for. Afterwhich, a round of interviews will be taken by the Directors **[Meeting 3]**.
- All the positions will be allotted according to the ranking decided by the directors and will be announced **[Meeting 4]**.
- All the people irrespective of their designation have to choose any one program of their choice & should also have the pertaining skills related to the program that they are choosing.
- The company will be launched **[Meeting 5]**.

Meetings	Events	Who should attend	Expected Date
	Recruitment		25/10/2023 -25/10/2023
Meeting 1	Orientation	All	28/11/2023
Meeting 2	Directors selection	Who applied for that position.	30/11/2023
Meeting 3	CEOs, Program Managers, Project Managers	Who applied for that position.	1/12/2023
Meeting 4	Designation Announcement	All	6/12/2023
	Company Registration		13/12/2023
	Company Incorporation		3/01/2024
Meeting 5	Company Launch Day	All	9/01/2024

The Recruitment

- The recruitment has already begun, Under Graduate Students & above are eligible for this.
- The applicant should be from an Engineering/Pure Science background to apply for the company.
- The applicant should choose any vacant position mentioned in the **Allotment section**.
- The applicant should also choose any one Program of their interest & should have keen interest in it.
- The applicant is expected to have some sort of experience in the field that they are applying for.
- The applicant is most preferred if they are graduating in 2025,2026 & 2027.
- The applicant should make a bond with the company of at least 2 years (for 2025 graduates), 3 years (for 2026 graduates), 4 years (for 2027 graduates).

Benefits for the applicant

- The applicant gets an **internship** offer from the company as soon as they join. Internship certificates will be provided on successful completion of the same.
- As soon as the internship is done, the candidate is now eligible to work as an engineer in the company & will be offered with the **actual engineering job** before even graduating/having a degree.
- The work that is being completed by the candidate can be submitted as their **4th Year Mega Project** for their college/University.
- The candidate will be taken to multiple International/National/Regional **Hackathons, Competitions** for participation & can get to network, learn new things, winning the competition etc.,
- The candidate will be given **some company shares** (through their CEOs) once the bond is done, for which they can exchange it for **money** when the individual subsidiary company touches a threshold of ₹100Cr.
- The candidate will also be given **some crypto currency** (Bock Coin) when Bock Chain releases its token on its native blockchain.

The Company Shares

- The company shares will only be allotted to 3 Directors & 6 CEOs.
- No other person holds the company shares other than the above mentioned people until & unless an investor walks in.
- This is for the parent company.
- 1 of 3 Directors is the founder and he shall hold 20% of the company shares.
- The other two Directors shall hold 10% each of the company shares.
- All the other 6 CEOs hold 10% each of the company shares.
- This is for each separate subsidiary companies (independent from parent & other subsidiary company, other subsidiary companies cannot interfere in any way to a subsidiary companies).
- 1 of 3 Directors is the founder and he shall hold 20% of the company shares.
- The other two Directors shall hold 10% each of the company shares.
- The CEO holds the rest 50% of shares each in their individual subsidy company.
- If the founder possesses/arranges money/wants to exchange the shares by giving the equivalent money to the other two directors & the other six CEOs, he can do the same anytime.
- The shares with the other two directors & CEOs will be returned to the founder when the individual subsidiary company reaches the threshold valuation of ₹100 Crore.
- In exchange the founder should buy those 10% shares from Directors & CEOs in exchange for equivalent money.
- If the founder fails to give the equivalent money in exchange when the individual subsidiary company reaches the threshold valuation of ₹100 Crore. Then the shares shall remain in the same hands. But, the founder can still buy the same, in exchange to the equivalent money in future whenever it is possible.
- The money received from the Founder to the CEO of the particular subsidiary company will be equally divided among the employees & the CEO including Program Managers, Project Manager(s) & Engineers of the respective subsidiary company.
- After the shares exchange, the employee will be paid in salary by the company & shall no longer ask for company shares.
- Any negotiation in retaining the shares can be considered, yet it is completely decided by the founder & no one can question it.

Bock Internship Program

Accountability

Welcome to the Bock Internship Program! We are excited to offer you an opportunity to immerse yourself in the world of technology and innovation. Our internship program is designed to provide aspiring professionals with hands-on experience and mentorship in various technological domains. All internships with the Bock Departments are unpaid internships.

Application Submission requirements :

- All candidates must complete and submit a written application prior to the following dates:
 - a. Students **seeking a winter internship(December through May)** must submit an application before November 25.
 - b. Students **seeking a summer internship(June through November)** must submit an application before May 25.

Selection :

Applications will be reviewed following the due dates. Applicants will be contacted by the CEOs, to either set up an interview or to be informed they will not proceed in the selection process. Selections shall be made after designated applicants have been interviewed.

Duties

- Interns will be assigned to various units, projects, and courses divisions during the internship. Our goal is to familiarize the intern with all aspects of the department operations.
- Interns may be required to do special studies, prepare written reports, perform clerical, data entry and maintenance tasks, as well as other duties that arise during the internship. Written and oral communication skills are emphasized during this program.

Bock Internship Program

- The intern may be asked to participate in special programs and will participate in a series of ride-alongs, as observers, with the Program Manager in the project.
- Collaborate effectively with team members, share ideas, and actively participate in group discussions and projects. Be proactive in seeking learning opportunities, asking questions, and exploring new technologies and methodologies.
- Respect and maintain the confidentiality of company information, data, and projects. Demonstrate a proactive attitude by taking the initiative to solve problems and contribute innovative ideas to projects.

Work Hours :

- Interns are expected to work 1.5 hours a day, all seven days a week. It is expected that interns work approximately 7-10 hours a week. Hours are adjusted as needed based on specific tasks or assignments.

Other Requirements :

- Each intern will be assigned a dedicated Project Manager who will provide guidance, feedback, and support throughout the internship period.
- Regular check-ins and feedback sessions will be conducted to track your progress and address any concerns or questions you may have.
- The interns are expected to attend all the meetings that will be conducted offline (no online meetings are entertained).
- We may have upto 2 meetings (in normal cases) & more than 2 meetings (in case of any competitions/investor pitch) a month.

INTERNSHIP OFFER LETTER

00/00/0000

Greetings **XYZ**,

We are overjoyed to extend this offer to you for the **AAAA** Training/Internship Program at BOCK **BBBB**, a business that focuses on **BBBB**. This training/internship is an excellent educational opportunity created to give you knowledge about the fascinating field of **BBBB** technology.

You have a **6 months** of internship period of **Hybrid internship program** starting on **December 01, 2023**, and ending on **May 31, 2024**. Please be aware that this is an unpaid program with the main goal of improving your skills and expertise in the field of **BBBB**. We are sure that working with us will provide you with incalculable experiences and opportunities to learn, laying the groundwork for your potential careers in the field of **BBBB**.

We eagerly anticipate a fruitful and beneficial working relationship throughout this internship, and we look forward to seeing how you develop and contribute to our **BBBB**-related projects. I hope you have the most enjoyable and rewarding internship program ever.

Sincerely BOCK **BBBB**,

Director/Founder

JOB OFFER LETTER

00/00/0000

Greetings **XYZ**,

We are overjoyed to extend this offer to you for the **AAAA** Engineer at **BOCK BBBB**, a business that focuses on **BBBB**. This has been offered to you after completing the training/internship program at **BOCK BBBB**.

Your expected date of joining **[Date]**.

We will be offering you the following compensation & benefits :

You will have some percentage of company shares from your CEO, which you will exchange it for money while you leave/when a threshold is attained in company's valuation (₹100Cr).

Please report to **LMNO (CEO, BOCK BBBB)** before the joining date for documentation & orientation .

We are confident you will be able to make a significant contribution to the success of **BOCK BBBB** and look forward to working with you.

Sincerely **BOCK BBBB**,

Director/Founder

CEO, Bock BBBB

Jobs at Bock

These are some set of rules for the people who are offered jobs at Bock :

These rules are put forward so that the company doesn't get exploited by the employees, because the company does so many things for its employees & in return the company expects loyalty from the employees.

- Once the candidate completes the internship program, they are offered a job as an actual engineer though they don't possess any equivalent degree.
- Jobs are only offered to those who complete the internship program, no one shall have any exemption. Everyone has to complete it so as to get a job.
- No shares will be provided for those people who just do the internship.
- Shares will only be given to those who continue to work in the company after completing the internship programme (for those who have applied for jobs).
- The candidate shall make a bond with the company of at least 2 years (for 2025 graduates), 3 years (for 2026 graduates), 4 years (for 2027 graduates).
- The bond is unbreakable. In case of any, legal actions will be taken with some penalty being charged.
- If the candidate wants to work in any other company, they should get an approval from the directors (will only be approved if you're getting the work done without causing any hindrance in our company).
- The candidate will be taken to multiple International/National/Regional Hackathons, Competitions for participation. People cannot deny the company in not getting involved in these. In case of any disputes between this company's team & some other team (maybe with some friends), the person should always prioritize this company first.
- The candidate should always get an approval from the directors if they are participating in any competitions/events. They should keep the company well informed about these things.
- If the above 2 rule is not satisfied, the company shall charge some penalty on the candidate.

Work at Bock

- The work will start after the completion of training/internship.
- Due to the presence of already experienced people , the Phase-1 may already get started during the training/internship program as per the Directors instructions.
- Starting from Phase-1 every phase will have its own different Project Managers. All these Project Managers will collectively report the work to their respective Program Manager, from there to their CEO & then ultimately to the Directors.

Bock Automotive

Phase	Work	Engineers Involved	Timeline
Phase 0	Training/Internship	All	Dec23-May24
Phase 1	Designing the automobile, the concept Sedan Car is called Self-Powered Vehicles (SPVs) (CAD, Electrical, Electronics, testing & validation in simulation/softwares).	All	Dec23-Nov24
Phase 2	Building the MVP of our SPV (If MSME/Nidhi Prayas/any other grants are approved).	All	Feb24-Jun25
Phase 3	Planning & building the whole manufacturing facility virtually (in Nvidia Omniverse).	Few Mechanical Engineers, Nvidia Omniverse Engineers	Jun24-Jun25
Phase 4	Going out for funding (for building a manufacturing facility/building a production line). Estimated to be 500-800Cr.	All(Team will be expanded & More engineers will be added)	Jul25
Phase 5	Building the manufacturing facility & training all the robots in the production line.	All	Aug25-Aug27
Phase 6	First 500 cars will be manufactured (20 cars will be launched in the first round).	All	Sept27
Stage 2	Sport Car Variant		
Stage 3	2/3 Wheeler Variant		
Stage 4	Hyperloop Development		

Work at Bock
